SUMMARY

3rd year Computer Science student with a minor in Cyber Security. Passionate about building projects, solving challenging problems, and collaborating in teams.

WORK EXPERIENCE

Editor

Aug 2025 – Present

CSI Club, Nirma University

- Led and executed events including *Treasure Hunt*, *Scribblify*, *Hack-NU-Thon*, and *BID2CODE* engaging 1000+ participants.
- Coordinated promotional campaigns, boosting event reach and participation.

PROJECTS

SyncUp

[Demo Link](#)

Full-stack web platform to connect users for group activities based on interests and availability.

- Frontend with **Next.js** and **Tailwind CSS**, featuring dark mode, profiles, interest tags, and Pod creation.
- Implemented RSVP tracking, availability input, and preference-based filters for group coordination.

BBM92 QKD Simulator

Simulator using **Python** and **Qiskit** to model BBM92 protocol over free-space satellite-ship channel.

- Simulated entangled photon transmission with realistic noise and attenuation.
- Integrated QKD metrics: **QBER**, **SKR**, **SNR**, and **Shannon entropy**.
- Modeled eavesdropping detection and reconciliation for security.

EDUCATION

2023 - 2027	B.Tech Computer Science, Nirma University	(GPA: 8.14/10)
2022	Higher Secondary, Netaji Model School	(94.08 percentile)
2020	Secondary, Netaji Model School	(97.51 percentile)

RESEARCH

Satellite-Vehicular Communication: Researched free-space optics-based quantum communication and implemented various quantum cryptographic protocols. Manuscript submitted (expected Dec 2025).

ACHIEVEMENTS

Top 30 Finalists – *Smart India Hackathon 2024, Nirma University*: Proposed deepfake detection system using AI/ML.

Top 25 Selection – *Hacovate 2025*: Selected among top 1200 participants for AI Hackathon; developed a real-time fraud detection system “ScamShield”.

TECHNICAL SKILLS

Languages:	C++, C, Python, JavaScript, Next.js, Tailwind CSS, Tkinter
Databases:	MySQL, Supabase
Core Concepts:	OOP, DSA, Computer Networks, Operating Systems
